

# **SURROGACY FEE SCHEDULE**

**CARE FERTILITY**

# CONSULTATION

## Surrogacy Consultations

Both the intended parent(s) and the host must have a consultation pre- treatment

### Registration fee

**£580.00**

We charge a one-off, non-refundable fee to cover the time we invest in working with you to plan and organise your surrogacy pathway

Initial consultation for Intended Parent(s)

**£270.00**

Initial consultation for surrogate

**£250.00**

Intended parents specialist consultation

**£195.00**

International surrogacy meeting fee

**£300.00**

### Recommended surrogacy pre-consultation screening

If you have had an AMH test or scan within the six months or a diagnostic semen analysis test within the last year you can share the results with your chosen Care clinic these tests won't usually need to be repeated

Diagnostic semen analysis for the sperm provider(s)

(only required if an IP is providing sperm for treatment. If both IPs are potential sperm providers both will need a DSA)

**£210.00**

Detailed 3D pre-treatment scan for surrogate

**£230-260\***

Detailed 3D pre-treatment scan for egg provider

(only required if an IP is providing eggs for treatment)

**£230-260\***

Anti-Mullerian Hormone level blood test for egg provider

(not required if using donated eggs for treatment)

**£140.00**

Pre Assessment profile

**£148.00**

\*Prices vary based on location please see the fee schedule for your Care Fertility clinic or contact our specialist team to confirm. Please be assured you will be provided with a personalised cost estimate prior to committing to services

# TREATMENT

## INTRAUTERINE INSEMINATION WITH PARTNER OR DONATED SPERM

### IUI treatment

**£4,315.00**

Treatment cost covers; consultation and planning with a Care donation expert; monitoring scans; thawing and preparation of sperm; insemination; pregnancy scan or post treatment review appointment; counselling support.

### Infectious screening for the sperm provider

Cost includes screening at the time the sample is provided and post quarantine.

- **Initial sperm donor screen**

**£1,266.00**

- **Screen at time of donation / Sperm donor post quarantine**

**£474.00**

### Freezing of sperm

**£260.00**

It is a requirement that the intended parent's sperm is frozen for a three-month quarantine period after which the IP must undergo repeat infectious screening before the sperm can be used. Price is per person requiring semen freeze

### Estimated drug cost

50% of our patients pay less than £40 for their drugs in an IUI cycle

For the remaining 50%, the typical cost of medication is £375, but in rare situations a treatment may require medication costing up to £771. The type of cycle we recommend depends on medical history and the results of tests carried out as part of pre-treatment planning.

### HFEA fee

**£40.00**

only applicable if using donated sperm

# TREATMENT

## IVF SURROGACY

### IVF with fresh transfer to surrogate

**£8,620.00**

Treatment costs include; consultation and planning with a Care donation expert; in treatment monitoring scans and blood tests; sperm thaw and preparation; egg collection with conscious sedation or local anaesthetic or thaw of donor eggs; embryo creation and culture; embryo transfer; pregnancy scan or post treatment review appointment; counselling support.

### IVF with freeze of all embryos

**£5,410.00**

Treatment costs include; consultation and planning with a Care donation expert; in treatment monitoring scans and blood tests if IP providing eggs; sperm thaw and preparation; egg collection with conscious sedation or local anaesthetic or thaw of donor eggs; embryo creation and culture; freezing and one year's storage of all frozen embryos. Frozen embryo transfer to surrogate is not included.

### IVF using own frozen eggs Surrogacy

**£8,030.00**

The cost includes nurse consultation, monitoring scans, thawing of eggs, sperm preparation, ICSI, embryo culture, embryo transfer to surrogate, pregnancy scan or post-treatment review appointment and counselling support.

### Infectious and genetic screening for the sperm provider

only applicable if using the IP's sperm

- Initial sperm donor screen

**£1,266**

- Screen at time of donation / Sperm donor post quarantine

**£474**

### Infectious screening for the surrogate

- Standard Virals and Chlamydia screening

**£233**

- Standard infectious screening

**£225**

# TREATMENT

## Estimated drugs costs

All of our patients have a personalised treatment plan with drug costs between £935 and £2600. An estimated 25% of patients are prescribed drugs costing £935 and 25% £2595 with 50% of patients prescribed drugs costing somewhere in between these two figures. When treatment is successful, we prescribe additional medication known as “luteal support” up to the 10th week of pregnancy. The typical additional cost of luteal support medication is £115

## HFEA Fee

**£100.00**

## Intracytoplasmic sperm injection (ICSI)

**£1,445.00**

This is required if using IP sperm and the results of the sperm providers diagnostic semen analysis or previous treatment history indicate it is needed.

## ADDITIONAL COST OF DONATED EGGS

- **with fresh donated eggs**

**£7,465**

If there are fewer than nine eggs in a fresh donation cycle, then a refund of £3,000 will be given.

- **a set of 6 frozen donated eggs from the Care egg bank**

**£3,555**

We require a part payment of £1,135 of your treatment fee to secure the allocation of your chosen eggs and their transfer to your treating Care clinic. We only guarantee the availability your selected eggs for 3 months and if they are not used in treatment within that time, they may not be available. The part payment is non-refundable but can be used against any future treatment. ICSI is included in costs as standard when using frozen eggs from Care’s egg bank.

- **a set of 9 frozen donated eggs from the Care egg bank**

**£7,465**

We will require a part payment of £1,135 of your treatment fee to secure the allocation of your chosen eggs and their transfer to your treating Care clinic. We only guarantee the availability your selected eggs for 3 months and if they are not used in treatment within that time, they may not be available. The part payment is non-refundable but can be used against any future treatment. ICSI is included in costs as standard when using frozen eggs from Care’s egg bank.

- **eggs from a known donor**

**£7,890**

This fee excludes the cost of the donor’s initial consultation, pre-consultation screening tests, drugs and infectious screening. This fee includes £985 donor expenses paid to the donor following egg collection.

# TREATMENT

## Estimated drug costs for the known donor's ovarian stimulation:

Our medication is tailored to each donor based on their medical history and blood test results. 73% of our patients have a treatment plan with drug costs between £935 and £1911. Some donors - usually those over 35 - need extra medication. It's challenging to estimate likely medication costs but they can range from £935 to £2595. Please be reassured that we will tell you the exact cost of the drugs we recommend before you decide to start treatment.

## Infectious and genetic screening for your known donor

**£1,465**

The law requires all clinics to perform infectious and genetic screening for an egg donor. Screening is required initially and in every cycle of stimulation.

## Registration fee

**£565.00**

We charge a one-off, non-refundable fee to cover the time we invest in working with you to identify a suitable donor

## Additional cost of donor sperm

### Donor sperm for Care's sperm bank

**£1,330**

Includes donor matching, reservation and transfer of donor sperm to your chosen Care clinic and donor sperm for one treatment cycle

## Frozen Embryo Transfer (FET)

Treatment costs include; nurse planning; monitoring scans for the surrogate having; in treatment blood tests; embryo thawing and culture; embryo transfer; pregnancy scan or post treatment review appointment; counselling support.

### Frozen embryo transfer (FET) to host of Care created embryos

**£3,475**

### First frozen embryo transfer (FET) to host of externally created embryos

**£5,355**

### Subsequent (FET) to host of externally created embryos

**£3,475**

## Drug costs

Patients having transfer of frozen embryos are typically prescribed drugs costing between £150 and £410 to prepare their uterus for embryo transfer. When treatment is successful, we prescribe additional medication. This cost of this further luteal support medication is £225.

Our research has shown that 33% of our patients don't absorb enough progesterone medication from pessaries. In these patients we recommend use of injectable progesterone as "rescue luteal support". The cost of this medication is £795.

# TREATMENT

## PREIMPLANTATION GENETIC TESTING (PGT-A)

This is an optional embryo selection treatment. PGT-A can only be provided in an elective freeze all IVF treatment cycle.

<b>Initial Genetics Counselling Appointment 60 mins</b>	<b>£295.00</b>
---	----------------

<b>Follow Up Genetics Counselling Appointment 30 mins</b>	<b>£150.00</b>
---	----------------

### PGT-A (within a treatment cycle)

<b>PGT-A fee</b>	<b>£1,395</b>
------------------	---------------

The fee includes treatment set up, biopsy set up and Caremaps. Extended culture and ICSI (if required) are not included in the fee.

<b>PGT-A fee per embryo biopsied</b>	<b>£375.00</b>
--------------------------------------	----------------

### PGT-A (testing of previously frozen embryos)

<b>Embryo thaw, biopsy, and refreeze</b>	<b>£1,325</b>
--	---------------

fee includes embryo thaw, treatment set up, biopsy set up.

<b>PGT-A fee per embryo biopsied</b>	<b>£375.00</b>
--------------------------------------	----------------

## OTHER FEES

For fees relating to supplementary procedures, specialist treatment option, gamete import, freezing and storage and please see the fee schedule for your Care Fertility clinic.

# TREATMENT CANCELLATION POLICY

## CANCELLATION POLICY

Occasionally treatment cycles are cancelled. The information below sets out the most common scenarios and the amount payable in each case:

### **Frozen embryo replacement, IUI**

**£650.00**

Cancelled at the monitoring stage.

### **IVF**

**£955.00**

Cancelled at the monitoring stage.

### **IVF with donated eggs**

**£950-£1110\***

Cancelled at the monitoring stage.

If treatment is cancelled post-monitoring but before embryo replacement, then a refund will be paid to the patient as follows:

Failed egg recovery (plus HFEA fee refund)

**£565 -£695\***

Failed fertilisation/cleavage

**£485.00**

Failed frozen embryo thaw (plus HFEA fee refund)

**£955.00**

\*Prices vary based on location please see the fee schedule for your Care Fertility clinic or contact our specialist team to confirm. Please be assured you will be provided with a personalised cost estimate prior to committing to services

# PAYMENT

## PAYMENT OPTIONS

Treatment fees are paid before the treatment starts. Bank transfer, debit and credit cards are accepted methods of payment. Our preferred method is by debit card.

In cases where your health insurance may fund consultations and investigations, you must pay the fees directly to Care Fertility and then claim the cost back from your insurer. We are unable to negotiate claims directly with health insurers.

Care Fertility reserves the right to amend prices. If you have a consultation with Care Fertility and agree to a recommended course of treatment, we will provide you with a fully costed treatment plan and an invoice that sets out the cost of the medications we recommend. Once the treatment and medication invoices are paid, we will provide treatment for the agreed price, which will not change unless we give you six months' notice. If we implement price changes before you have paid your invoices for treatment then we will provide you with an updated costed treatment plan and invoices so that we can expressly agree the cost of treatment with you before you enter into a contract with Care Fertility by paying for your treatment and medication.

Effective from 1 January 2025.
